

IDEA 2530

26 APR 1965

MEMORANDUM FOR: Assistant Director, OSA

SUBJECT: Adjustment of Delta II Program

1. The Delta II Camera System has not been utilized significantly during the past year due to the high weight and drag penalty incident to its use. We are presently converting two of the four possessed Delta II's to the Delta III configuration which will be about 150 pounds lighter and flush-faired into the aircraft. The two new cameras will be available in June. Pending receipt of these, it is proposed that the Delta II configurations, personnel, and spares now at [REDACTED] be returned to [REDACTED], where the configurations will be held immediately available for introduction into the modification program as each Delta III becomes operationally ready. In the unlikely event that a Delta II requirement should arise prior to receipt of the new cameras, the older units could be deployed from [REDACTED]
